Meet Harold Tate, M.D., at Open House April 4.

Harold A. Tate, M.D., an experienced diagnostic radiologist, specializing in all aspects of vascular and interventional radiology, has joined Vascular Access Center of Durham as medical director.

Vascular Access Centers is a national practice specializing in dialysis access care, screening and treatment of peripheral arterial disease. Here, health care teams led by interventional physicians are dedicated to the care and treatment of patient with access needs.

“Vascular Access Centers offers an alternative setting for vascular procedures. Our expertise is in maintaining continued function, preservation and restoration of a patient’s access,” says Dr. Tate. “Vascular Access Centers provides the framework of resources and support that is essential for optimal clinical outcomes and improved quality of life for patients.”

Vascular Access Centers physicians are among the nations’ leaders in vascular access care. Dr. Tate graduated from the Howard University College of Medicine. He completed his diagnostic radiology training at the Martin Luther King Jr. Medical Center, University of California, Los Angeles-Charles R. Drew University, Los Angeles, California, during which he served as chief resident in his fourth year. He completed a fellowship at the Beth Israel-Deaconess Medical Center, Harvard Medical School, Boston, Massachusetts.

Dr. Tate is board-certified by the American Board of Radiology and earned its Certificate of Added Qualification in vascular and interventional radiology. He maintains an active membership in the Society of Interventional Radiology.

“I am excited about this great opportunity at VAC of Durham to provide exceptional, expedient clinical care and excellent outcomes and unparalleled service to patients throughout this region,” Dr. Tate says.

State-of-Art Vascular Access Services

Vascular Access Center of Durham offers hemodialysis fistula and graft interventions, complete catheter services and peripheral arterial disease screening and treatment.

Comprehensive dialysis access maintenance includes thrombectomy/thrombolysis, fistulagrams, fistula maturation procedures, vessel mapping, central venous occlusion treatment and complete catheter services.

Expanded VAC of Durham services include central venous access for oncology, nutritional and medication delivery, and limb salvage.

Get More Acquainted

Vascular Access Centers operates in 21 locations throughout 13 states. VAC of Durham is the sole location in North Carolina.

Dr. Tate comes to VAC of Durham from a practice in Texas. Prior to that, he served as a radiologist in the United States Air Force. In his spare time, Dr. Tate enjoys spending time with family, travel, motorcycling and sports.

The Raleigh-Durham medical community is invited to meet Dr. Tate at VAC of Durham during an open house Thursday, April 4, from 5:30-7:30 p.m.

For more information about VAC’s specialized services and medical staff, patient referrals or appointments, call (919) 251-6605 or visit www.vascularaccesscenters.com. Hours are Monday through Friday from 8 a.m. to 5 p.m.
